

RAPID COVID TEST Test with swabs Panbio Covid 19 AG RTD
Abbott Rapid Diagnostic Jena GmbH, Germany

I (name & surname) _____

born (place of birth) _____

on (date of birth) _____ Codice Fiscale _____

Social Security Number _____

Cell number _____ email _____

I am aware that:

- The test is carried out with the painless insertion in both nostrils with a thin swab. The test has a sensibility of about 96%. That it will take 15 minutes for the results.
- In case of a positive result, a molecular PCR test will be performed immediately (which is the only test that has legal validity). In case of a positive result, my name will be communicated to the Region of Friuli for the Quarantine procedure.
- In case of a positive result, I must reach my residence and stay there until my quarantine ends.
- A positive result of the molecular test must be communicated to the attending doctor in order to start the legal procedures.
- In case of cohabitating families (especially if elderly) strict prevention procedures will be applied (mask to be worn at home – sanitation – distancing).

I have read and understood the above list I agree I disagree

To perform the rapid/molecular test for the detection of the Sars-Covid-2 Virus (covid-19)
